

RESPONSIBILITIES OF MOTORSPORT COMPETITORS AND SERVICE CREWS

In order to create a sustainable legacy for future motor sport generations all motorsport competitors must respect and reduce their impact on the environment by following a few basic guidelines stipulated in the MSA Environmental Code:

1. Ensure that the motor vehicle complies with the maximum sound level limit allowed for the specific discipline.
2. Prevent soil and water pollution by using designated containers for the safe disposal of used vehicle fluids.
3. Use an Environmental Mat to prevent soil & water pollution due to leaking or spilled vehicle fluids.
4. Prevent littering and pollution by using designated refuse containers or refuse bags.
5. Avoid damaging natural embankments of rivers.
6. Only use designated wash areas for the washing of vehicles. Use only water, not detergents, for washing.
7. Keep your pit and paddock areas clean at all times.
8. Avoid parking on grass verges, plants and shrubs.
9. Don't leave punctured or damaged tyres along the route of an off-road event.
10. Do not start fires along the route or at service parks under adverse weather conditions.
11. Stick to the designated route markers and do not to create new routes or short cuts.
12. Do not maliciously or intentionally damage, kill or maim any species of fauna or flora.

(see illustrated page)

**THE FUTURE OF MOTORSPORT ACTIVITIES
DEPENDS ON THE LEVEL OF RESPONSIBILITY
EACH OF US IS PREPARED TO TAKE ON TO
MINIMISE THE DEPLETION OF NATURAL
RESOURCES AND POLLUTION OF THE
ENVIRONMENT.**

**ENVIRONMENTAL COMPLIANCE POSES A HUGE
CHALLENGE FOR THE FUTURE.**

**IT IS UP TO EACH ONE OF US TO ACCEPT THIS
CHALLENGE!**

MSA's Environmental Code, which has detailed information and guidelines for all motorsport roleplayers, is available on our website:

motorsport
south africa going greener, faster.

MOTORSPORT AND THE ENVIRONMENT

Our natural environment is being threatened on a daily basis in ways that negatively affect our lives. We can only live in a healthy environment if we all behave in a way that supports, develops and sustains such an environment.

All society's stakeholders, including sporting federations, must adopt concrete measures to reduce their negative impact on the environment to ensure our well-being and that of present and future generations.

We need to ensure that motorsport takes place under conditions that demonstrate a responsible attitude towards the environment. By creating environmental awareness among our competitors we can encourage them to act in a responsible manner. This will protect our environment while at the same time creating a sustainable legacy for future motor sport generations.

The future of motorsport activities, in fact of human activities, depends on each of our sense of responsibility towards the environment. MOTORSPORT SOUTH AFRICA hopes that competitors in all categories of motorsport will continue to enjoy their chosen discipline, while at the same time caring for the environment.

THE RACING DRIVER'S ENVIRONMENTAL PLEDGE

MOTORSPORT SOUTH AFRICA'S ENVIRONMENTAL CREED

Every person has the right to enjoy nature while, at the same time, respecting its value to humanity.

Our right to practise sports in natural surroundings must be accompanied by ethical and moral rules that are respected by all and promoted by participating roleplayers.

We must protect nature from any form of negligence, or exploitation or any practice which may harm it.

The right to particular natural surroundings should only be limited when overridden by irrefutable proof of the need to preserve them.

In keeping with the spirit of Universal Citizenship, each practitioner pledges to inform themselves about and to promote the principles of conserving natural habitats.

Nature is, and must always be, the heritage of humanity.

Man is, and must always be, its protector.

The world we live and work in, and enjoy sport and relaxation in, is wondrous. Let us present an even more wonderful world to the generations still to leave footprints on this earth, footprints that are transient and non-destructive.
