2. For Cars, Karts and Quads the whole area underneath the vehicle, where there is the prime probability of fluid spills, must be covered with a ground protecting sheet or environmental mat.
3. In combination with the Environmental Mats or ground sheets, other ground protecting systems like fluid absorbent material, oil spill kits, etc. can be used to clear spillages. These materials must be disposed of in a hazardous waste container.
4. The key elements to consider when deciding on an environmental mat, are the following:
  - a. The **absorption** capacity of the mat (or ground protecting device) so that no puddles are formed on top.
  - b. Under no circumstances must it allow vehicle fluids to seep through onto the soil/surface, thus having to consist of an impermeable (liquid proof) base.
5. Under no circumstances may these mats be disposed of in a standard refuse bin. A hazardous waste container must be available at a designated point within the DSP (Designated Service Point). Any damaged mats **MUST** be disposed of in this container. Alternatively, the soiled mats can be placed in a sealed plastic container for disposal by a hazardous waste disposal company.

Any such penalties shall normally only be considered for imposition on competitors whose actions/driving conduct led to the race being stopped and/or those who gained an advantage by pitting rather than taking the normal re-start.
