MSA RALLY CIRCULAR 5 OF 2025

Affected parties are hereby advised that permission has been granted to install a micro water spraying system in front of the radiator/intercooler, directly behind the decorative grille, for classes **NRC1**, **NRC2**, and **NRC2 Kit**.

A micro water-spraying system in front of the radiator/intercooler, immediately behind the decorative grille, will be allowed.

The sprayers may not be positioned in any way that sprays water into the engine combustion air inlet. There is no limit on the number of sprayers. The TCs will approve the position of the sprayers, and their decision is final.

A water tank (maximum 10 liters) fitted with an electric pump, controlled either by a driver-actuated on/off switch or a temperature and/or boost-controlled switch actuated by the ECU, is permitted. The tank must be made of clear or opaque plastic with a maximum capacity of 10 liters. Only clean water, suitable for human consumption, may be used. No additives are allowed.

The carrying of a supplementary water container for topping up the water tank is not permitted. No weight compensation will be allowed. The minimum race weight remains as per the Weight Regulations.

The water tank, with a secure cap, must be mounted on the floor behind the fuel tank in a two-volume car, or in the boot of a three-volume car, and mounted to the satisfaction of the TCs.

ISSUED ON BEHALF OF THE MSA RALLY WORKING GROUP

SAMANTHA VAN REENEN
