- In combination with the Environmental Mats or ground sheets, other ground protecting systems like fluid absorbent material, oil spill kits, etc. can be used to clear spillages. These materials must be disposed of in a hazardous waste container.
- The key-elements to consider, when deciding on an environmental mat, are the following:
 - The absorption capacity of the mat (or ground protecting device) so that no puddles are formed on top.

 - Under no circumstances may these mats be disposed of in a standard refuse bin. A hazardous waste container must be available at a designated point within the DSP (Designated Service Point).
